Waterlattice

Waterlattice is a luxurious mattress for people who wish to spend a little more and enjoy enhanced comfort and a deeper sleep. Providing a medium / firm support, the Waterlattice has been developed to provide maximum comfort, optimum orthopaedic support and to ensure the correct positioning of the spine.

Its unique design allows an even air flow through the mattress that prevents the build up of moisture, leading to a better night's sleep.

Normal Mattress

Waterlattice

A normal mattress progressively loses its original elasticity resulting in deteriorating posture of the body during rest.

The internal structure of WATERLATTEX allows the body to retain a correct & comfortable posture.

The Waterlattice's elasticity and the way it fits comfortably to the body, promotes relaxation of the muscles and good circulation. Breathing naturally helps prevent the build up of heat and moisture commonly associated with traditional foam mattresses.
