The Hideaway bed is our top of the range integrated wall bed system. It is manufactured to the highest quality offering the user the ultimate space saving experience. Integrated wall bed systems are designed to be fitted into purpose built cabinets to create the stunning 'Hideaway effect', where you have the appearance of a beautifully fitted cabinet which springs out to form a bed in less than 20 seconds.

It is designed to have a two-piece door attached to the base of the bed, with the top doors forming a foot-board when the bed is lowered. The Hideaway bed has an adjustable sprung mechanism which gives a safe, light and easy lifting action.

The patented, enclosed counter-sprung mechanism takes the weight of the bed & mattress, and when folded away, the bed & cabinet typically sit only 53cm from the wall, allowing space to work or play. The sprung, slatted mattress base ensures enhanced spinal support and comfort. We also provide interlocking straps which allows the bed to be stored with the bedding already made up, making the whole experience effortless.

Limited 5 YEAR warranty on manufacturer defects. Misuse, abuse, or damage by misapplication are not covered. Please note: wall bed frames and mechanisms are illustrated with cabinets and doors (purchased separately) for demonstration purposes only.
